LEO Global Logistics Collaborates with Sahathai Terminal to Establish Thailand's Pioneering Automated Cold Chain Logistics Center

On June 7th, LEO Global Logistics and Sahathai Terminal, a comprehensive terminal and logistics solutions provider along the Chao Phraya River, formed a strategic partnership to launch Thailand's groundbreaking project, the 1st Intelligent & Robotic Cold Chain Bonded Warehouse and Logistics Center in Bangkok. This state-of-the-art facility represents the country's first automated temperature-controlled warehouse and has received official endorsement from the Customs Department as a bonded warehouse, offering customers significant advantages regarding import duties.

Mr. Kettiwit Sittisunthornwong, CEO of LEO Global Logistics, unveiled, "Our collaboration with Sahathai Terminal introduces an innovative warehouse and distribution center that incorporates advanced temperature control systems managed by computer technology and robotic automation. Operating within a freezer room set at temperatures ranging from 0 to 25 degrees Celsius, the implementation of Automation & Robot systems addresses the challenge of diminishing labor resources and enables us to deliver rapid and precise services according to our customers' requirements."

"LEO is extremely honored to partner with Sahathai Terminal. As a provider of comprehensive logistics services that cater to both general and temperature-controlled cargo, this collaboration plays a crucial role in strengthening our preparedness and facilitating our future growth, ensuring we can meet the evolving needs of our customers."

LEO intends to seek investment support from the Board of Investment (BOI) by leveraging incentives aimed at promoting investments in robotics and automation implementation, thereby benefiting from tax advantages. Additionally, the logistics provider aims to establish the Cold Chain Warehouse and Logistics Center as an environmentally friendly facility, utilizing solar energy and implementing a sustainable management system that actively contributes to reducing global warming and carbon emissions.

The 1st Intelligent & Robotic Cold Chain Bonded Warehouse and Logistics Center in Bangkok is located at Sahathai Terminal, Poochaosamingprai Road, Tumbon Bangyaprak Prapradang, Samuthprakarn. With a substantial investment budget of 232 million baht, the project includes a property rental cost of 72 million baht over the contract period and a project development investment of 160 million baht. It is projected to generate a minimum income of 800 million baht throughout the project's duration.

Mr. Banchai Karuchit, Deputy Chief Executive Officer of Sahathai Terminal, expressed his delight in partnering with LEO, stating, "Sahathai Terminal is delighted to contribute to the growth of LEO's business and enhance the level of logistics services. We are committed to introducing innovative technologies in warehouse management that will significantly improve work efficiency throughout the entire logistics cycle."
